

Agent Console

Ten agents, each with a narrow remit, its own guardrails and an evaluation threshold it must pass before release. Operations and AI governance see this view; it is not part of the bid user experience.

Per-agent and per-tender cost ceilings enforced by the orchestrator

Model routing — cost control

Economy tier	62%
Workhorse tier	29%
Frontier tier	9%

Classification and routing run on the economy tier; the frontier tier is reserved for Stages 3, 5, 6 and 7 where reasoning quality changes the outcome.

Provider is a configuration value. A switch is a revalidation exercise against the evaluation harness, not a rebuild.
